Bnft App for Illinois eWIC

Getting started

Downloading the Bnft® app

To download the Bnft app, search BNFT from the App Store® or Google Play™.

Features

The Bnft app has the following features available:

- Real time available benefit
- PIN selection or change
- Store locator
- Push notifications
- Barcode scanner
- Transaction history
- Report card as lost, damaged or stolen

Redeeming Your Benefits

Available Balance

The Available Balance page provides you with the remaining benefits by category/subcategory for the current benefit period.

Store Locator

Enter your zip code to locate the nearest WIC approved vendor location. You must have your location services turned on to use this feature.

Barcode Scanner

You can use the barcode scanner in store to locate eligible food items.

Align the barcode in the target area as shown. Once the UPC is captured, the user will be notified if the product is eligible or not.

If the barcode cannot be captured by the scanner, the user can enter the code manually.
