

# Illinois WIC Program Formulary

Effective: July 2025

The WIC Program promotes and supports breastfeeding as the normative standard for infant feeding and nutrition. WIC recognizes some infants and children will need formula to treat complex medical conditions. WIC provides support, counseling, and other WIC foods when appropriate but does not provide all therapeutic formulas that may be needed. Below is a listing of the formulas currently provided through the Illinois WIC program.

For those with a current medical card, the Illinois Department of Healthcare and Family Services (HFS) may pay for therapeutic formulas not covered by WIC and should be referred to a Durable Medical Equipment provider for assistance.

Ready to Feed (RTF) products may only be issued in cases where there is unsanitary or restricted water supply, poor refrigeration, when the caregiver has difficulty correctly preparing powder or concentrate formula, physician deems medically necessary for an infant born prematurely or when RTF is the only available option. Branded designations or marketing descriptors such as “NeuroPro” used by formula manufacturers does not indicate a significant difference in formulation that qualifies the product for RTF issuance.

Contract Formula	0-3 months	4-5 months	6-12 months	> 1 year	Size (oz)	Form
Enfamil Infant	9	10	7	10	12.5	Powder
	31	34	24	35	13	Concentrate
