

Memorandum

To: WIC Coordinators

From: Stephanie Bess, M.S., R.D., LDN
Associate Director, Office of Family Wellness

Subject: IWIC Release 2025.11

Date: October 28, 2025

On Wednesday, November 12, 2025, IWIC will be upgraded with Release 2025.11. Changes associated with this release are detailed below.

#	Reported Issue	Correct Functionality							
1	Answers to the questions in the Health screen are completed but move to history after a Breastfeeding Status Change (BFC)	Answers to the questions in the Health screen do not move to history after a BFC is completed.							
2	When a Date of Birth (DOB) change is completed, the Cert End date does not update to reflect the new certification period.	If the DOB change results in a change to the certification period, the WIC MIS will update the Cert End date in the Cert Action screen and the Active Record box.							
3	The implementation of the infant food packages impacted the package assignment for children with infant fruits and vegetables causing the validation message regarding the quantity of infant fruits and vegetables to display.	This issue has been corrected.							
#	Enhancements: LAB Screen								
4	The Immunization Status question has been removed, a new tab named Screenings and a grid for entering Immunization Status has been added.								
	The Lead column in the Bloodwork grid has been removed. A new tab named Screenings and a grid for entering Lead information has been added.								
	The Bloodwork grid has been moved from the main Lab screen to the new Screenings tab. The name of the grid has been revised to Hemoglobin/Hematocrit. Other changes to the columns include:								
	<table> <tr> <th>Added</th><th>Removed</th><th>Moved & Renamed</th></tr> <tr> <td rowspan="2">Notes</td><td>Date Created</td><td>Non-WIC to Non-WIC Data</td></tr> <tr> <td>Lead</td><td>Date of Bloodwork to Date</td></tr> </table>		Added	Removed	Moved & Renamed	Notes	Date Created	Non-WIC to Non-WIC Data	Lead
Added	Removed	Moved & Renamed							
Notes	Date Created	Non-WIC to Non-WIC Data							
	Lead	Date of Bloodwork to Date
